iBCPM - E810 Series
Power Quality & Energy Meter

Product Description

The E810-Series (iBCPM) is an effective branch circuit power monitoring system and part of the Graphene-Meter-Series. The compact design allows an easy and fast commissioning. Combined with the split-core CTs of the ESCT-Series, the E810 is highly suitable for retrofit applications.

It measures and displays characteristics of electrical systems such as voltage, frequency, current, power, harmonics, power factor, maximum, minimum value, and imported or exported energy.The built-in interfaces provide standard RS485 Modbus RTU outputs with password protection to transfer the collected data to any other system.

It makes the E810-Series a perfect partner for various applications like accurate data collection and timely reporting of anomalies in the power distribution unit (PDUs).

Device Features

- Measurement accuracy according to IEC62053-22 Cl 0.5S
